Journal of Fluorine Chemistry, 39 (1988) 442 - 448

Subject Index of Volume 39

Acid-catalyzed reactions
of 2,2,2-trifluorodiazoethane with alcohols; mechanistic aspects of, 283
Addition reactions
asymmetric; synthesis of optically active trifluoromethylated compounds via; enzymes active in organic media, 75
of F-alkyl iodides to C–C double bonds promoted by metallic tin(0)–metal salt systems, 299
Wilkinson's catalyst-induced addition of fluoroalkyl iodides to olefins; fluoroalkylation and fluoroalkoxylation, 217
Alcohols
mechanistic aspects of acid-catalyzed reactions of 2,2,2-trifluorodiazoethane with, 283
reaction of, with N,N-diethyl-1,1,2,3,3,3-hexafluoropropylamine in presence of diisopropylethylamine, 17
synthesis of 2-perfluoro-nhexyl ethanol $C_6F_{13}C_2H_4OH$ by electrochemical reduction of 2-perfluoro-nhexyl-1-iodo ethane $C_6F_{13}C_2H_4I$ on carbon fibres in solvent N,N-dimethylformamide, 245
Alkenes, Olefins
fluoroalkylation and fluoroalkoxylation; Wilkinson's catalyst-induced addition of fluoroalkyl iodides to, 217
synthesis of bicyclo [2·2·1] hept-2-enes with mono- and disubstituted long perfluorinated chains C_nF_{2n+1} (n = 4,6,8, 10); association in solution by ^{19}F NMR study of polymerization via metathetic reaction, 173
Alkoxylation
fluoro-, and fluoroalkylation:
magnesium single-electron-transfer induced synthesis of 2-fluoroalkylpyrroles, 289
Wilkinson's catalyst-induced addition of fluoroalkyl iodides to olefins, 217
Alkylation
fluoro-; facile method for, of aniline and its derivatives, 87
fluoro-, and fluoroalkoxylation:
magnesium single-electron-transfer induced synthesis of 2-fluoroalkylpyrroles, 289
Wilkinson's catalyst-induced addition of fluoroalkyl iodides to olefins, 217
Allylation
and preparation of difluoromethylcadmium, 425
Amine
mechanism of difluoroamine deaminations, 317
reaction of alcohols with N,N-diethyl-1,1,2,3,3,3-hexafluoropropylamine in presence of diisopropylethylamine, 17
selective fluorination of ethyl 1-methylpyrazole-4-carboxylates with poly(hydrogen fluoride)-amine complex under electrolytic anodic oxidation, 435
Antimony
bis(trifluoromethyl)fluorosulphonium(IV)-metallate(V) $(CF_3)_2SF^+MF_6^-$ (M = As, Sb), 141
Aromatic compounds
new approach to synthesis of aryldifluorophosphines; formation of *cis*-dichlorobis(aryldifluorophosphine) platinum(II) complexes, 197
biocatalytical transformations; enantioselective hydrolysis of N-acetyl-fluorophenylalanine-ethylesters by lyophilized yeast, 99
effect of fluorine substitution on stretching vibrations of azoxy group in azoxybenzenes, 373
facile method for fluoroalkylation of aniline and its derivatives, 87
fluorinations with potassium tetrafluorocobaltate(III); fluorinations of toluene and of phenylacetic acid, 23
fluoroalkylation and fluoroalkoxylation; magnesium single-electron-transfer induced synthesis of 2-fluoroalkylpyrroles, 289
hindered rotation in phosphorus ylides substituted by an F-alkyl-2 ethyl group; NMR and X-ray crystallography, 1
reaction of fluorinated ketones with dialkyl phosphites; efficient and selective transformation of aryl F-alkyl ketones into dialkyl aryl (F-alkyl)methyl phosphates, 293

© Elsevier Sequoia/Printed in The Netherlands

selective fluorination of ethyl 1-methyl-pyrazole-4-carboxylates with poly-(hydrogen fluoride)-amine complex under electrolytic anodic oxidation, 435
thermal condensation of indoles with trifluoroacetaldehyde, 47
Arsenic
bis(trifluoromethyl)fluorosulphonium(IV)-metallate(V) $(CF_3)_2SF^+MF_6^-$ (M = As, Sb), 141
Aziridines
applications of fluorinated 1,3-dipolar compounds as building blocks of heterocycles with fluorine groups; synthesis of trifluoromethylisoxazolines and their rearrangement into trifluoromethyl aziridines, 39

Biocatalytical transformations
enantioselective hydrolysis of N-acetyl-fluorophenylalanine-ethylesters by lyophilized yeast, 99
Bismuth
synthesis of xenon(VI) fluorobismuthate(V), 309
Bromine
new synthesis of trifluoromethylketones and α-bromo trifluoromethylketones, 271

Cadmium
preparation and allylation of difluoro-methylcadmium, 425
Carbon bonds
addition reactions of F-alkyl iodides to C–C double bonds promoted by metallic tin(0)–metal salt systems, 299
photochemical reduction of carbon–halogen bonds; regioselectivity of reaction in fluorinated halogenopropanoates, 397
Carbon fibres
synthesis of perfluoroalkane carboxylic and sulphinic acids by electrochemical reduction of perfluoroalkyl iodides on a carbon fibre cathode in solvent N,N-dimethylformamide; application to synthesis of perfluoro-α,ω-diacids, 125
synthesis of 2-perfluoro-nhexyl ethanol $C_6F_{13}C_2H_4OH$ by electrochemical reduction of 2-perfluoro-nhexyl-1-iodo ethane $C_6F_{13}C_2H_4I$ on carbon fibres in solvent N,N-dimethylformamide, 245
Carbon NMR study
^{19}F, ^{13}C and ^{14}N NMR study of trifluoromethyl isocyanide, 305
Chlorine
new approach to synthesis of aryldifluorophosphines; formation of *cis*-dichlorobis(aryldifluorophosphine) platinum(II) complexes, 197
reactions of tellurium chloride pentafluoride, TeF_5Cl, with nitrogen nucleophiles; preparation and characterization of adducts $(TeF_4)_2 \cdot NR_2Cl$, where R = CH_3, C_2H_5, 235
synthesis of 2-chloro-2,4,4-trifluoro-1,3-dithietane and its sulphur oxides, 329
synthesis of fluorinated polysiloxanes; polydimethyl siloxane oligomers fluorinated at the extremities by condensation of fluorinated chlorosilanes with α,ω-disilanols, 61
Cobalt
fluorinations with potassium tetrafluorocobaltate(III); fluorinations of toluene and of phenylacetic acid, 23
Condensation
synthesis of fluorinated polysiloxanes; polydimethyl siloxane oligomers fluorinated at the extremities by, of fluorinated chlorosilanes with α,ω-disilanols, 61
thermal, of indoles with trifluoroacetaldehyde, 47
Crystallography
X-ray, and NMR; hindered rotation in phosphorus ylides substituted by an F-alkyl-2 ethyl group, 1
Cyclization
radical, on trifluoromethyl-substituted carbon; facile preparation of trifluoromethylated five-membered ring compounds, 431
Cyclohexanes
fluoro-; dehydrofluorinations of *cis* and *trans* isomers of 2H-1-(difluoromethyl)-decafluorocyclohexane, 227

Deuterium
characterization and spectroscopic study of monodeuterated trifluoromethylphosphane $F_3CP(H)D$, 385
Diffusion
^{19}F NMR diffusion studies of molecules adsorbed on zeolites, 349

Electrochemical reduction
synthesis of perfluoroalkane carboxylic and sulphinic acids by, of perfluoroalkyl iodides on a carbon fibre cathode in solvent N,N-dimethylformamide; appli-

cation to synthesis of perfluoro-α,ω-diacids, 125
synthesis of 2-perfluoro-nhexyl ethanol $C_6F_{13}C_2H_4OH$ by, of 2-perfluoro-nhexyl-1-iodo ethane $C_6F_{13}C_2H_4I$ on carbon fibres in solvent N,N-dimethylformamide, 245
Electrolytic anodic oxidation
selective fluorination of ethyl 1-methylpyrazole-4-carboxylates with poly(hydrogen fluoride)-amine complex under, 435
Enzymes
active in organic media; synthesis of optically active trifluoromethylated compounds via asymmetric addition reactions, 75
immobilized; synthesis of optically active fluorinated materials by use of, for asymmetric hydrolysis, 107

Fluorides
Selective fluorination of ethyl 1-methylpyrazole-4-carboxylates with poly(hydrogen fluoride)-amine complex under electrolytic anodic oxidation, 435

di-
Carbanion fluorination with xenon difluoride in presence of sulphur(II) derivatives, 415

tri-
Structure of dimethylamino-sulphurtrifluoride and some aspects of amino-sulphur(IV)-fluorine chemistry, 261

penta-
Reactions of tellurium chloride pentafluoride, TeF_5Cl, with nitrogen nucleophiles; preparation and characterization of adducts $(TeF_4)_2 \cdot NR_2Cl$, where R = CH_3, C_2H_5, 235

Fluorination(s)
Carbanion, with xenon difluoride in presence of sulphur(II) derivatives, 415
Dehydro-, of *cis* and *trans* isomers of 2H-1-(difluoromethyl)decafluorocyclohexane, 227
With potassium tetrafluorocobaltate(III); fluorinations of toluene and of phenylacetic acid, 23
Selective, of ethyl 2-methylpyrazole-4-carboxylates with poly(hydrogen fluoride)-amine complex under electrolytic anodic oxidation, 435

Fluorine
Effect of fluorine substitution on stretching vibrations of azoxy group in azoxybenzenes, 373
^{19}F, ^{13}C and ^{14}N NMR study of trifluoromethyl isocyanide, 305
^{19}F NMR diffusion studies of molecules adsorbed on zeolites, 349
Prosthetic group for rapid introduction of fluorine into peptides and functionalized drugs, 339
Structure of dimethylamino-sulphurtrifluoride and some aspects of amino-sulphur(IV)-fluorine chemistry, 261
Synthesis of bicyclo [2·2·1] hept-2-enes with mono- and disubstituted long perfluorinated chains C_nF_{2n+1} (n = 4,6,8,10); association in solution by ^{19}F NMR study of polymerization via metathetic reaction, 173

Fluoro-compounds
Addition reactions of F-alkyl iodides to C–C double bonds promoted by metallic tin(0)–metal salt systems, 299
Biocatalytical transformations; enantioselective hydrolysis of N-acetyl-fluorophenylalanine-ethylesters by lyophilized yeast, 99
Facile method for fluoroalkylation of aniline and its derivatives, 87
Fluorinated polyacetylene, 421
Fluoroalkylation and fluoroalkoxylation:
magnesium single-electron-transfer induced synthesis of 2-fluoroalkylpyrroles, 289
Wilkinson's catalyst-induced addition of fluoroalkyl iodides to olefins, 217
Fluorocyclohexanes; dehydrofluorinations of *cis* and *trans* isomers of 2H-1-(difluoromethyl)decafluorocyclohexane, 227
Hindered rotation in phosphorus ylides substituted by an F-alkyl-2 ethyl group; NMR and X-ray crystallography, 1
Pentafluorotelluriumoxide derivatives of fluorocarbons, 153
Photochemical reduction of carbon–halogen bonds; regioselectivity of reaction in fluorinated halogenopropanoates, 397
Reaction of fluorinated ketones with dialkyl phosphites; efficient and selective transformation of aryl F-alkyl ketones into dialkyl aryl (F-alkyl)methyl phosphates, 293
Synthesis:
convenient, of 2-alkyl-3-fluoro-3-polyfluoroalkyl-2-propenals, 323

of fluorinated polysiloxanes; polydimethyl siloxane oligomers fluorinated at the extremities by condensation of fluorinated chlorosilanes with α,ω-disilanols, 61
of optically active fluorinated materials by use of immobilized enzymes for asymmetric hydrolysis, 107
of pentafluoroseleniumoxide fluorocarbons, 163
and spectroscopic studies of some fluorinated 1,3,5-triazine derivatives, 117
of xenon(VI) fluorobismuthate(V), 309

di-

New approach to synthesis of aryldifluorophosphines; formation of *cis*-dichloro-bis(aryldifluorophosphine) platinum(II) complexes, 197
Mechanism of difluoroamine deaminations, 317
Preparation and allylation of difluoromethylcadmium, 425

tri-

Applications of fluorinated 1,3-dipolar compounds as building blocks of heterocycles with fluorine groups; synthesis of trifluoromethylisoxazolines and their rearrangement into trifluoromethyl aziridines, 39
Bis(trifluoromethyl)fluorosulphonium(IV)-metallate(V) $(CF_3)_2SF^+MF_6^-$ (M = As, Sb), 141
Characterization and spectroscopic study of monodeuterated trifluoromethylphosphane $F_3CP(H)D$, 385
Enzymes active in organic media; synthesis of optically active trifluoromethylated compounds via asymmetric addition reactions, 75
^{19}F, ^{13}C and ^{14}N NMR study of trifluoromethyl isocyanide, 305
Mechanistic aspects of acid-catalyzed reactions of 2,2,2-trifluorodiazoethane with alcohols, 283
Radical cyclization on trifluoromethyl-substituted carbon; facile preparation of trifluoromethylated five-membered ring compounds, 431
Reaction behaviour of trifluoromethylated formamidine, 357
Synthesis:
of 2-chloro-2,4,4-trifluoro-1,3-dithietane and its sulphur oxides, 329
new, of trifluoromethylketones and α-bromo trifluoromethylketones, 271
Thermal condensation of indoles with trifluoroacetaldehyde, 47

tetra-

Fluorinations with potassium tetrafluorocobaltate(III); fluorinations of toluene and of phenylacetic acid, 23

hexa-

Reaction of alcohols with N,N-diethyl-1,1,2,3,3,3-hexafluoropropylamine in presence of diisopropylethylamine, 17

per-

Synthesis:
of bicyclo [2·2·1] hept-2-enes with mono- and disubstituted long perfluorinated chains C_nF_{2n+1} (n = 4,6,8,10); association in solution by ^{19}F NMR study of polymerization via metathetic reaction, 173
of perfluoroalkane carboxylic and sulphinic acids by electrochemical reduction of perfluoroalkyl iodides on a carbon fibre cathode in solvent N,N-dimethylformamide; application to synthesis of perfluoro-α,ω-diacids, 125
of 2-perfluoro-nhexyl ethanol $C_6F_{13}C_2H_4OH$ by electrochemical reduction of 2-perfluoro-nhexyl-1-iodo ethane $C_6F_{13}C_2H_4I$ on carbon fibres in solvent N,N-dimethylformamide, 245

Formamide
synthesis of perfluoroalkane carboxylic and sulphinic acids by electrochemical reduction of perfluoroalkyl iodides on a carbon fibre cathode in solvent N,N-dimethylformamide; application to synthesis of perfluoro-α,ω-diacids, 125
synthesis of 2-perfluoro-nhexyl ethanol $C_6F_{13}C_2H_4OH$ by electrochemical reduction of 2-perfluoro-nhexyl-1-iodo ethane $C_6F_{13}C_2H_4I$ on carbon fibres in solvent N,N-dimethylformamide, 245
Formamidine
reaction behaviour of trifluoromethylated formamidine, 357
Functionalized drugs
and peptides; prosthetic group for rapid introduction of fluorine into, 339

Halogeno compounds
photochemical reduction of carbon–halogen bonds; regioselectivity of reaction in fluorinated halogenopropanoates, 397
Heterocycles
applications of fluorinated 1,3-dipolar compounds as building blocks of, with fluorine groups; synthesis of trifluoromethylisoxazolines and their rearrangement into trifluoromethyl aziridines, 39
Hydrolysis
asymmetric; synthesis of optically active fluorinated materials by use of immobilized enzymes for, 107
enantioselective, of N-acetyl-fluorophenylalanine-ethylesters by lyophilized yeast; biocatalytical transformations, 99

Iodine
addition reactions of F-alkyl iodides to C–C double bonds promoted by metallic tin(0)–metal salt systems, 299
fluoroalkylation and fluoroalkoxylation; Wilkinson's catalyst-induced addition of fluoroalkyl iodides to olefins, 217
synthesis of perfluoroalkane carboxylic and sulphinic acids by electrochemical reduction of perfluoroalkyl iodides on a carbon fibre cathode in solvent N,N-dimethylformamide; application to synthesis of perfluoro-α,ω-diacids, 125
synthesis of 2-perfluoro-nhexyl ethanol $C_6F_{13}C_2H_4OH$ by electrochemical reduction of 2-perfluoro-nhexyl-1-iodo ethane $C_6F_{13}C_2H_4I$ on carbon fibres in solvent N,N-dimethylformamide, 245
Isocyanide
^{19}F, ^{13}C and ^{14}N NMR study of trifluoromethyl isocyanide, 305
Isomers
fluorocyclohexanes; dehydrofluorinations of *cis* and *trans* isomers of 2H-1-(difluoromethyl)decafluorocyclohexane, 227

Ketones
reaction of fluorinated ketones with dialkyl phosphites; efficient and selective transformation of aryl F-alkyl ketones into dialkyl aryl (F-alkyl)methyl phosphates, 293
new synthesis of trifluoromethylketones and α-bromo trifluoromethylketones, 271

Magnesium
fluoroalkylation and fluoroalkoxylation; magnesium single-electron-transfer induced synthesis of 2-fluoroalkylpyrroles, 289
Metathetic reaction
synthesis of bicyclo [2·2·1] hept-2-enes with mono- and disubstituted long perfluorinated chains C_nF_{2n+1} (n = 4,6,8,10); association in solution by ^{19}F NMR study of polymerization via, 173

Nitrogen
^{19}F, ^{13}C and ^{14}N NMR study of trifluoromethyl isocyanide, 305
nucleophiles; reactions of tellurium chloride pentafluoride, TeF_5Cl, with; preparation and characterization of adducts $(TeF_4)_2 \cdot NR_2Cl$, where R = CH_3, C_2H_5, 235

Olefins: see Alkenes
Oligomers
synthesis of fluorinated polysiloxanes; polydimethyl siloxane oligomers fluorinated at the extremities by condensation of fluorinated chlorosilanes with α,ω-disilanols, 61
Optical activity
enzymes active in organic media; synthesis of optically active trifluoromethylated compounds via asymmetric addition reactions, 75
synthesis of optically active fluorinated materials by use of immobilized enzymes for asymmetric hydrolysis, 107
Oxidation
electrolytic anodic; selective fluorination of ethyl 1-methylpyrazole-4-carboxylates with poly(hydrogen fluoride)-amine complex under, 435

Peptides
and functionalized drugs; prosthetic group for rapid introduction of fluorine into, 339
Phosphorus
new approach to synthesis of aryldifluorophosphines; formation of *cis*-dichlorobis(aryldifluorophosphine) platinum(II) complexes, 197
characterization and spectroscopic study of monodeuterated trifluoromethylphosphane $F_3CP(H)D$, 385

hindered rotation in phosphorus ylides substituted by an F-alkyl-2 ethyl group; NMR and X-ray crystallography, 1
reaction of, fluorinated ketones with dialkyl phosphites; efficient and selective transformation of aryl F-alkyl ketones into dialkyl aryl (F-alkyl)methyl phosphates, 293
Photochemical reduction
of carbon–halogen bonds; regioselectivity of reaction in fluorinated halogenopropanoates, 397
Platinum
new approach to synthesis of aryldifluorophosphines; formation of *cis*-dichlorobis(aryldifluorophosphine) platinum(II) complexes, 197
Polyacetylene
fluorinated, 421
Polymerization
synthesis of bicyclo [2·2·1] hept-2-enes with mono- and disubstituted long perfluorinated chains C_nF_{2n+1} (n = 4,6,8,10); association in solution by ^{19}F NMR study of, via metathetic reaction, 173
Potassium
fluorinations with potassium tetrafluorocobaltate(III); fluorinations of toluene and of phenylacetic acid, 23
Prosthetic group
for rapid introduction of fluorine into peptides and functionalized drugs, 339

Reduction
electrochemical:
synthesis of perfluoroalkane carboxylic and sulphinic acids by, of perfluoroalkyl iodides on a carbon fibre cathode in solvent N,N-dimethylformamide; application to synthesis of perfluoro-α,ω-diacids, 125
synthesis of 2-perfluoro-nhexyl ethanol $C_6F_{13}C_2H_4OH$ by, of 2-perfluoro-nhexyl-1-iodo ethane $C_6F_{13}C_2H_4I$ on carbon fibres in solvent N,N-dimethylformamide, 245
photochemical, of carbon–halogen bonds; regioselectivity of reaction in fluorinated halogenopropanoates, 397
Rotation
hindered, in phosphorus ylides substituted by an F-alkyl-2 ethyl group; NMR and X-ray crystallography, 1

Selenium
synthesis of pentafluoroseleniumoxide fluorocarbons, 163
Silicon
synthesis of fluorinated polysiloxanes; polydimethyl siloxane oligomers fluorinated at the extremities by condensation of fluorinated chlorosilanes with α,ω-disilanols, 61
Spectroscopy
characterization and spectroscopic study of monodeuterated trifluoromethylphosphane $F_3CP(H)D$, 385
^{19}F, ^{13}C and ^{14}N NMR study of trifluoromethyl isocyanide, 305
^{19}F NMR diffusion studies of molecules adsorbed on zeolites, 349
hindered rotation in phosphorus ylides substituted by an F-alkyl-2 ethyl group; NMR and X-ray crystallography, 1
synthesis of bicyclo [2·2·1] hept-2-enes with mono- and disubstituted long perfluorinated chains C_nF_{2n+1} (n = 4,6,8,10); association in solution by ^{19}F NMR study of polymerization via metathetic reaction, 173
synthesis and spectroscopic studies of some fluorinated 1,3,5-triazine derivatives, 117
Stretching vibrations
effect of fluorine substitution on, of azoxy group in azoxybenzenes, 373
Sulphur
bis(trifluoromethyl) fluorosulphonium(IV)-metallate(V) $(CF_3)_2SF^+MF_6^-$ (M = As, Sb), 141
carbanion fluorination with xenon difluoride in presence of sulphur(II) derivatives, 415
structure of dimethylamino-sulphurtrifluoride and some aspects of amino-sulphur(IV)-fluorine chemistry, 261
synthesis of 2-chloro-2,4,4-trifluoro-1,3-dithietane and its sulphur oxides, 329
synthesis of perfluoroalkane carboxylic and sulphinic acids by electrochemical reduction of perfluoroalkyl iodides on a carbon fibre cathode in solvent N,N-dimethylformamide; application to synthesis of perfluoro-α,ω-diacids, 125

Tellurium
pentafluorotelluriumoxide derivatives of fluorocarbons, 153

reactions of tellurium chloride pentafluoride, TeF_5Cl, with nitrogen nucleophiles; preparation and characterization of adducts $(TeF_4)_2 \cdot NR_2Cl$, where R = CH_3, C_2H_5, 235
Thermal condensation
of indoles with trifluoroacetaldehyde, 47
Thietane
synthesis of 2-chloro-2,4,4-trifluoro-1,3-dithietane and its sulphur oxides, 329
Tin
addition reactions of F-alkyl iodides to C–C double bonds promoted by metallic tin(0)–metal salt systems, 299
Triazine
synthesis and spectroscopic studies of some fluorinated 1,3,5-triazine derivatives, 117

Wilkinson's catalyst
-induced addition of fluoroalkyl iodides to olefins; fluoroalkylation and fluoroalkoxylation, 217

Xenon
carbanion fluorination with xenon difluoride in presence of sulphur(II) derivatives, 415
synthesis of xenon(VI) fluorobismuthate(V), 309

Yeast
lyophilized; enantioselective hydrolysis of N-acetyl-fluorophenylalanine-ethylesters by; biocatalytical transformations, 99
Ylides
hindered rotation in phosphorus ylides substituted by an F-alkyl-2 ethyl group; NMR and X-ray crystallography, 1

Zeolites
^{19}F NMR diffusion studies of molecules adsorbed on, 349
